**Subject:** April 16th CoE Progress

Please see attached the progress we are making from a TTS perspective.

Just two slides:

- | One highlights the work the team has been doing in response to Covid-19. Lots of great partnership between the WH and all of TTS as our teams have stepped up and have delivered with great pace
- | The second slide highlights our continued growth in CoE activity despite Covid.

Given everyone's schedules and social distancing, I am assuming we are not having this month's meeting this Thursday.

Thank you and let me know if you have any questions.

Regards,

Anil

Good afternoon Mary,

I am sending updated information regarding the employee impact RFI:

GSA has an additional (1) employee case to report. He/she has tested positive for COVID-19, bringing our agency total to twelve (12) reported employee cases. The new case is as follows:

1. NCR

This employee is in the NCR but is not a HQ employee.

Thank you and available for any questions/concerns,

Bobby

Hi Emily, Thanks for checking in! Yes, that is correct. We should have the full list for extensive cleaning today. I'll share with you as soon as we can.

Thank you,  
Monica

On Mar 21, 2020, at 2:37 PM, Emily Murphy - A <emily.murphy@gsa.gov> wrote:

Hi Monica -

I hope you are doing well amidst all the activity. I wanted to check in and confirm that GSA is handling the situation in the WH Complex as you intend. After last night's announcement, we've been getting questions/requests about fully cleaning the buildings from building tenants. It is my understanding that for the time being, you only want the standard cleaning? For now, we're increasing our cleaning of commonly touched surfaces, but are holding off on a more extensive cleaning until we get the go ahead from you.

Please let me know if that is correct, and if so, how you would like us to handle questions from those in the EEOB and West Wing.

Thanks,  
Emily

Given the current situation I would recommend we cancel the Principals meeting this month.

Will send out a deck with the content I would have covered regarding progress to date.

Let me know if you are all in agreement. Happy to keep the meeting but am sure we all have our hands full with the current issues.

Thanks

Coronavirus (COVID-19) Pandemic Whole-of-America Response

---

**Topline Briefing Points and Messages**

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of America response to fight the COVID-19 pandemic and protect the public.
- The health and safety of the American people are our top priority.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
- The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
- The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
- For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at [www.coronavirus.gov](https://www.coronavirus.gov).
- On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
- FEMA coordinated an air bridge for flights from Asia beginning Sunday, March 29 which delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
- The second flight landed in Chicago on March 30; and, one landed in Miami last night and another in New York this morning. FEMA has scheduled additional flights and is adding more daily.
- Each flight will contain critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
- Upon arrival, the PPE will be provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
- At present, the federal government has 10,469 total ventilators available, which includes 9,404 in the Strategic National Stockpile and 1,065 available from the Department of Defense.
- To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- Over the next 24 hours, FEMA and HHS will deliver ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (300), Illinois (150), Connecticut (50) and Louisiana (150).
- Thirty states and 12 tribes have issued stay at home orders.

## Coronavirus (COVID-19) Pandemic Whole-of-America Response

Monday, March 31, 2020

“This is a big-time, visible sign of what our government is like when we put it into action. FEMA’s working with the city, with the state, to supply everything we possibly can and working with HHS to get as many medical people here as we can. – Region II Regional Administrator Thomas Von Essen

### Topline Briefing Points and Messages

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of America response to fight the COVID-19 pandemic and protect the public.
- The health and safety of the American people are our top priority.
- On March 29, the president extended the nation’s [Slow the Spread](#) campaign until April 30. The American people play a key role in the campaign to help slow the virus’ spread and keep our most high-risk populations safe.
- The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
- For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at [www.coronavirus.gov](https://www.coronavirus.gov).
- On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
- FEMA coordinated an air bridge for flights from Asia beginning Sunday, March 29 which delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
- The second flight landed in Chicago on March 30. FEMA has scheduled additional flights and is adding more daily.
- Each flight will contain critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
- Upon arrival, the PPE will be provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.
- Over the next 48 hours, FEMA and HHS will deliver ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (300), Illinois (150), Connecticut (50) and Louisiana (150).
- Twenty-nine states and 12 tribes have issued stay at home orders.

**DAILY BRIEFING POINTS**

# Coronavirus (COVID-19) Pandemic Response

Tuesday, March 24, 2020

- > The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.
- > We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve: Stay home as much as possible. If you need to go out, practice social distancing.
  - > Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.
  - > On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts.
    - o This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. To date, 8,000 National Guard troops have activated to help with testing and other response efforts.
    - o Additional states can request this assistance and those requests will be considered.
  - > On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations.
  - > In addition, the states of New York, Washington and California were approved for major disaster declarations to assist with additional needs identified in these states.
  - > Medical supplies are en route to these states, including respirators, surgical masks and gowns, face shields, coveralls and gloves, with quantities already delivered to Washington and New York. We anticipate additional supplies will be delivered within the next 24 hours.
- > The U.S. Navy hospital ship Mercy is en route to Los Angeles to provide additional hospital beds and medical staff because the projected cases there are expected to be greater than Washington.
  - > FEMA issued a \$350 million Mission Assignment to the U.S. Army Corps of Engineers for construction of alternate care facilities in New York. Four sites have been selected.
  - > FEMA is working with the Department of Health and Human Services and the state of New York to complete the construction of a 1,000-bed medical station at the Jacob K. Javits Convention Center in New York City to care for patients with special health needs. These medical stations increase local healthcare capabilities and can be tailored to meet local requirements.

**CC:** Croghan, Mary E. EOP/WHO <(b) (6) (b) (6)>, McBride, Emily J. EOP/WHO <(b) (6) (b) (6)>, Connor, Cameron M. EOP/WHO <(b) (6) (b) (6)>, Paz, Brooke L. EOP/WHO <(b) (6) (b) (6)>

All,

First I want to begin with a note of thanks. All of you, and your incredible bosses, have been great partners as we continue to expand our fight against COVID-19 to the whole of government. I am reminded that at times such as this, you are only successful as the team that surrounds you. Just a quick moment to thank you for being part of that team.

Now, onto business. Two important items of note:

1. The private sector has been incredibly generous in their volunteering of services and products. It shows the grit of our country that people and companies are raising their hand to assist. We have seen this on everything from masks to testing supplies. If you, your boss or a senior member of your team receive such offers, please feel free to send them my way, with Mary Croghan cc'd, and we'll get them in the queue to identify where they can be utilized most. **Please include in your correspondence to Mary and me:**

- a. One sentence describing your relationship to the sender
- b. Indicate the level of priority
- c. If your boss requests follow-up/resolution on the topic
- d. As much detail as possible on the specifics of the offer

2. There has been some confusion on what type of comms needs to be cleared with the task force. Cabinet Affairs, the Coronavirus Task Force and OMB have drafted the attached guidance to assist agencies in understanding what needs to be cleared and what does not. Please circulate to your Comms team and let me know if there are any questions.

All the best,

Kristan

Hi Nick - I just saw the invite, and wanted to make sure you were aware that OSTP may not be needed in this meeting. I'd also say Bradley could probably sub for Derek if Derek is swamped with COVID.

Thanks,  
Emily

On Mon, Mar 2, 2020 at 9:54 PM Emily Murphy - A <[emily.murphy@gsa.gov](mailto:emily.murphy@gsa.gov)> wrote:

Hi Nick -

Given that the issue only involves the franchise fund provision, I'm not sure it is necessary to include OSTP. However, I'd suggest we add Suzette Kent, since the franchise fund could help with some of her priorities. Whether we need to invite Derek or Bradley Hayes from the Budget side is a close call - I know Bradley is aware of the issue.

I've asked my staff to put together a brief one pager on the issue, and that should be ready tomorrow morning. I can send it along then if that would be helpful.

Thanks,  
Emily

On Mon, Mar 2, 2020 at 7:45 PM Butterfield, Nicholas W. EOP/WHO  
<(b) (6) (b) (6)> wrote:

Hi Emily,

I understand that Chris agreed in your discussion last week to convene a meeting of key internal stakeholders regarding the AI in Government Act.

Below is my first shot at a list of meeting participants. Could you please fine tune this list, and we'll convene a meeting later this week?

**Participants**

Chris Liddell  
Emily Murphy  
Derek Kan  
Mike McKenna  
Michael Kratsios

Thank you much,

Nick Butterfield  
Deputy Assistant to the President  
Office of the Deputy Chief of Staff

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Tuesday, April 21, 2020

"With your help, with the continued support of leaders and states across the country, continued cooperation and strength of the American people, we will get through this. We are getting through this. We will continue to slow the spread. We will continue to save lives, and we will heal our land."  
- Vice President Pence

---

### Topline Briefing Points and Messages

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
  - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
  - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- On **April 20**, President Trump launched the Dynamic Ventilator Reserve Program, an innovative public-private partnership to access up to 65,000 additional ventilators in hospitals across the country that can be redeployed when not in use.
- As of **April 20**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 57.4 million N95 respirators, 85.3million surgical masks, 6.4 million face shields, 12.3 million surgical gowns, 638 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
  - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
  - On **April 17**, Vice President Pence issued a letter to the nation's governors summarizing the medical equipment and supplies that have been distributed to each state from FEMA from April 1 – 14 through Project Airbridge and the commercial supply network.
- The U.S. has now processed 4.3 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
  - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
  - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
  - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
  - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.

## Coronavirus (COVID-19) Pandemic Whole-of-America Response

Monday, April 27, 2020

"FEMA, HHS and our federal partners are committed to ensuring governors across the country have equipment, supplies and testing resources to reopen safely and responsibly."

- FEMA Administrator Pete Gaynor

---

### Topline Briefing Points and Messages

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
  - Vice President Pence spoke with the Nation's governors on **April 24**, reinforcing the partnership between the federal and state governments and the continued progress to expand and implement testing to be able to reopen safely and responsibly under the phased approach.
  - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources.
- On **April 26**, CDC and the Occupational Safety and Health Administration (OSHA) [released targeted guidance](#) to help meat and poultry processing facilities implement infection control practices to reduce the risk of transmission and illness from COVID-19 in these facilities.
  - Meat and poultry processing facilities present unique challenges for the prevention and control of COVID-19 transmission among workers.
  - Meat and poultry processing employers should implement a combination of engineering controls, cleaning and disinfection, social distancing, work practice controls, administrative controls, and use of personal protective equipment.
  - Basic worker infection prevention information and training should be provided to all workers in a clear and accessible manner, including training on social distancing and ways to reduce the spread of infection. To ensure accessibility, multi-lingual materials should be considered and made available, as appropriate.
- FEMA, HHS and the Cybersecurity Infrastructure and Security Agency (CISA) along with other federal agencies are distributing cloth face coverings as part of a multi-prong approach to re-open American economic activity while continuing to limit spread of COVID-19.
  - As of **April 26**, 32.5 million cloth face coverings are being processed and distributed to state, local, tribal, private sector, and federal entities
  - The facial coverings are being delivered in a phased approach for infrastructure workers, first responders and food producers who do not need medical-grade personal protective equipment (PPE) for their daily work. Distribution is based on CISA's analysis of priority infrastructure sectors.
  - The federal government will provide additional face coverings in production to states, territories and tribes for distribution, with priority to emergency services, food production and distribution, and other sectors that support community lifelines.
  - FEMA and HHS are also providing face coverings to federal departments and agencies with mission essential functions to promote health and safety in the workplace and in their execution of public-facing missions
- As of **April 26**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 74.7 million N95 respirators, 104.8 million surgical masks, 7.2 million face shields, 15 million surgical gowns, 798 million gloves, 10,603 ventilators and 8,450 federal medical station beds.
- The U.S. has now processed 5.2 million samples, which is more total tests than the

following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.

- States should be making full use of the testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
- HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.

**Subject:** Re: Follow up -- AI in Government Act

Hi Nick -

Given that the issue only involves the franchise fund provision, I'm not sure it is necessary to include OSTP. However, I'd suggest we add Suzette Kent, since the franchise fund could help with some of her priorities. Whether we need to invite Derek or Bradley Hayes from the Budget side is a close call - I know Bradley is aware of the issue.

I've asked my staff to put together a brief one pager on the issue, and that should be ready tomorrow morning. I can send it along then if that would be helpful.

Thanks,

Emily

## Coronavirus (COVID-19) Pandemic Whole-of-America Response

Friday, April 3, 2020

"I am grateful to these and other domestic manufacturers for ramping up their production of ventilators during this difficult time. Today's order will save lives by removing obstacles in the supply chain that threaten the rapid production of ventilators."

- President

Donald J. Trump

---

### Topline Briefing Points and Messages

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
- The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
- The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
- For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at [www.coronavirus.gov](https://www.coronavirus.gov).
- On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.
- On April 2, President Trump invoked the Defense Production Act to increase ventilator production. The order directed the supply of materials to make ventilators to six companies.
- On April 3, the Small Business Administration Paycheck Protection Program will begin offering nearly \$350 billion in loans to small businesses.
- If an employer maintains their workforce, the SBA will forgive the portion of the loan used to cover the first 8 weeks of payroll and certain other expenses.
- In addition to its traditional loan programs, the SBA is also providing Economic Injury Disaster Loans and forgiveness for up to six months of new and existing loans.
  - FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
- FEMA continues to coordinate an air bridge for flights from Asia. The first flight landed Sunday, March 29, and delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
- Additional flights landed in Chicago on March 30, Miami on March 31, Los Angeles on April 1, and Chicago and Columbus, Ohio, on April 3. FEMA has more flights scheduled and is adding more daily.
- Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
- Overseas flights are arriving at airports that are operational hubs. They are not indicators that the supplies will be distributed in those locations. All supplies are national supplies and will be distributed to hot spots and through the vendors regular supply chain to locations across the country.
- Upon arrival, PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain.

Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.

- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
- At present, the federal government has 9,800 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 900 available from the Department of Defense.
- To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
  - Since March 31, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (650), Illinois (150), Connecticut (50) and Louisiana (150).
  - FEMA will notify direct housing occupants in the states of California, Florida, North Carolina and Texas that they would suspend rent payment requirements for the months of April, May and June as a result of the ongoing impacts of COVID-19.
  - Thirty-one states and 12 tribes have issued stay at home orders.

## Coronavirus (COVID-19) Pandemic Whole-of-America Response

Monday, April 6, 2020

“We have the best doctors, the best military leaders, and the best logistics professionals anywhere in the world and we're orchestrating a massive federal response unlike anything our country has ever seen or done.”  
- President Donald J. Trump

---

### Topline Briefing Points and Messages

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
- The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
- For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at [www.coronavirus.gov](http://www.coronavirus.gov).
  - FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S. through Project Air Bridge. FEMA is scheduling flights daily but does not have detailed visibility on the amount of PPE until the cargo is loaded.
- Since March 29, flights have landed in New York, Chicago, Miami, Los Angeles, and Columbus, Ohio. On April 5, four additional flights landed in Chicago, Los Angeles, Columbus, Ohio and Louisville, Kentucky.
- Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks.
- Overseas flights are arriving at operational hub airports for distribution to hotspots and locations across the country through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations.
  - To efficiently maintain the country's existing medical supply chain infrastructure, FEMA is supplementing – not supplanting – the supply chain through a variety of strategies, including Project Airbridge.
- The air bridge was created to shorten the amount of time it takes for U.S. medical supply distributors to get personal protective equipment and other critical supplies into the country for their respective customers.
- FEMA is doing this by covering the cost to fly supplies into the U.S. from overseas factories, cutting the amount of time it takes to ship supplies from weeks to days.
- As part of the current agreement with distributors, 50 percent of the supplies on each plane are directed by the distributors to customers within hotspot areas with the most critical needs for those supplies. These areas are determined by HHS and FEMA based on CDC data.
- The remaining 50 percent is fed into that distributors' normal supply chain and onto their customers in other areas across the U.S.
  - HHS is releasing \$160 million dollars in additional CDC funding to dozens of regional hotspots. These funds will be used to support areas hard-pressed by COVID-19 in their work to respond effectively to the worsening situation in their jurisdictions.
  - The FDA issued an [Emergency Use Authorization of hydroxychloroquine sulfate](#) and an [Emergency Use Authorization of chloroquine phosphate](#) to treat certain patients hospitalized with COVID-19.
- Hydroxychloroquine sulfate and chloroquine phosphate are oral prescription drugs approved to treat malaria and other diseases but both drugs have shown activity in laboratory studies

against coronaviruses, including SARS-CoV-2 (the virus that causes COVID-19) and anecdotal reports suggest that these drugs may offer some benefit in the treatment of hospitalized COVID-19 patients.

- The Strategic National Stockpile has begun shipping doses of hydroxychloroquine to New York and Los Angeles County based on their requests.
  - Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure ventilators are shipped to the states in the amount needed to manage the immediate crisis.
- At present, the federal government has 8,644 total ventilators available, which includes 8,044 in the Strategic National Stockpile and 600 available from the Department of Defense.
  - As of April 4, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Alaska (60), California (170), Connecticut (50), Florida (200), Georgia (150), Illinois (600), Louisiana (350), Maryland (120), Massachusetts (100), Michigan (700), New Jersey (850), New York (4,400), and Washington (500).
- 140 ventilators that had previously been delivered to Oregon were donated to New York by Gov. Kate Brown.
- Additional allocations in process include a 250-bed Federal Medical Station and a Public Health strike team for Michigan; a 50-bed Federal Medical Station for the Metro D.C. area; 30 ventilators for Guam; and an 300 additional ventilators to New Jersey.
  - Forty states, four territories and 23 tribes have issued stay at home orders.

**Subject:** Fwd: R4 - Building closure - - Rome U. S. Courthouse and Federal Building

All -

Please see the attached. GSA did not make the decision to close this building. A judge for the district court in Rome GA issued an order closing the building, which will affect our other tenants (IRS, FBI, Rep. Tom Graves, etc). We are working the issue, but wanted to be sure you were aware.

Thanks,

Emily

<[brucew.hall@gsa.gov](mailto:brucew.hall@gsa.gov)>

Thanks **Adam** - looping in Central Office PBS, OGC, OMA and ASuite - in case they are not aware of this situation. You're correct, forward all media inquiries to [press@gsa.gov](mailto:press@gsa.gov), and please don't respond/engage with reporters. For now, we're holding off on a response template to media inquiries, as we need to deal with each inquiry individually here in CO. Thanks again for your help and good work here Adam.

**ASuite/PBS/OGC/OMA/OCIA** - please see the situation below. A judge with the Northern District of Georgia ordered the courthouse closed after a security officer there was hospitalized for possible COVID-19. This was done without consulting their building manager or anyone else in GSA. The order is attached. While the Court is by far the largest tenant, it also has office space for the FBI, IRS and U.S. Rep. Tom Graves. The order is attached.

OSC stands by to support however needed.

Hi everyone,

We have a unique situation at the federal courthouse in Rome, Ga. A judge with the Northern District of Georgia ordered the courthouse closed after a security officer there was hospitalized for possible COVID-19. This was done without consulting their building manager or anyone else in GSA. The order is attached. While the Court is by far the largest tenant, it also has office space for the FBI, IRS and U.S. Rep. Tom Graves.

My PBS RC's office asked about reactive statements. I've reiterated that all media inquiries will be sent directly to the press desk, but in case they ask, do we have templated reactive statement for building tenants?

Thanks,

Adam
